TECHNOLOGIES

Languages: PHP, HTML, CSS, Javascript, Python C, C#, Java,
Framework: Laravel, VueJs, ReactJS, Tailwind CSS, React Native, Django, Asp.Net Web Form/MVC, Android Studio(Java)
Tools: Git, Github, VS Code, Visual Studio, Postman, Figma
Database: MySql, Firebase

WORK EXPERIENCE

Software Developer – Intern | HiPE Japan Inc.   Feb 2024 –July 2024
Laravel, MySQL
- Collaborated with a team to develop an HRIS project
- Implemented a task board feature
- Retrieved and displayed tickets from the database, categorized by ticket type.
- Created a workspace client UI and integrated data display functionality

Application Developer | Willies English   July 2023 – Jan 2024
Android Studio
- Developed a mobile application
- Converted prototype from Figma into application

PROJECTS

POS System | Laravel, VueJs, TailwindCSS, MySQL

- Created UI for the Signup, Forgot Password, Brands, and Cart sections of the Merchant
- Implemented the Forgot Password API
- Integrated the Signup API with the Signup page
- Integrated the Brand APIs (CRUD operations) with the Brands page
- Improved signup page: Updated token cookie name, added redirect, loader, validation error display, and unique email rule.

2big Mobile App | React Native, Firebase   Github repo

- Collaborated a mobile application for our capstone project
- Implemented the following features in our system: order creation and tracking functionalities, utilizing the Map/Router feature through Google Cloud;
- Monitoring capabilities for delivery progress, order status, and customer points;
- The ability for customers to view a list of nearby water stations via map, including information about products, rates, and operating hour;
- Developed a feature that allows customers to post ratings and reviews for their experiences.
